Planet Earth Collection

The pristine landscapes of Iceland, details of grounds and mosses observed in a journey from the macro to the micro, inspired the Planet Earth collection designed by Margo Trushina.

The sampling of organic textures and patterns, as preserved in their inviolability over the years, has made it possible to carefully reproduce the soft appearance, the complexity of nuances, and overlapping colors of natural surfaces, from moss in bloom to the luminous spectrum of glaciers, to streams of water, reminding us that everything has a time.

Planet Earth is a tribute to nature's strength and fragility; aerial views become dynamic and abstract motifs when viewed up close.

To best represent the variety of surfaces, we combined the light of silk with the softness of wool yarns in different compositions and pile heights.

Designed by Margo Trushina

Margo Trushina has extensive experience exhibiting internationally: her works were presented at the Royal Academy of Arts (London), Museum of Modern Art (Turin), 5th Moscow Biennale of Contemporary Art, SFER IK Museum (Mexico) and many others. Her artistic practice reflects on the latest discoveries in the field of neuroscience, environmentally oriented practices and sustainability. Current ecological issues and challenges of our time - melting ice, the disappearance of plants, animal mutations, - become a topic for reflection and research for an artistic answer.
